Q: Does starting work on a next version of an app for iOS / OSX have any negative effects? Does keeping on a current version of my app for some time not only slow down/sustain the app sales but also decrease the stability and... more likely to break functionality? Can I just do something like "next version is already planned" and then a while later change the version?

A: If it's a new version of a major upgrade, it's usually good to give users a way to let you know about it on the App Store. That will give you an idea of whether there are any compatibility issues with your customers' devices, so it's a good idea to start your planning so that you'll have a few months to test everything before final release. Does keeping on a current version of my app for some time not only slow down/sustain the app sales but also

decrease the stability and... more likely to break functionality? Users won't notice (much) between major version releases. If you do make breaking changes, you should have a testing procedure ready so that
